Position: IT Project Manager  
 Location: Bristol  
 Salary: £50000 - £60000 per annum  
 Job Type: Full Time

The company client is a widely known organisation who are now seeking to hire a highly skilled IT Project Manager for their team office based in Bristol. The successful applicant will be primarily accountable for managing the delivery of high quality IT projects which span over multiple business areas within the business environment and for ensuring that the project objectives and business requirements are met.

Top duties will involve as follows:

- \* Applying and adhering to the Project Management principles and processes and ensuring that they are effectively applied throughout the lifecycle of the project, through to project closure and operational handover.
- \* Effective resolution of issues.
- \* Supporting, guiding, motivating and facilitating the project teams through the project processes.
- \* Identification and management of risks and opportunities.
- \* Communication of project progress to management and project stakeholders.

Background and competencies required:

- \* At least five years of dedicated IT

Project Manager - Digital  
Leeds / Ilkley  
£20,000-£30,000

This rapidly growing Digital Marketing Agency is looking to bolster their award winning digital team with the introduction of a Project Manager to co-ordinate the growing workflow for their department and play a pivotal role in managing projects between the digital, creative and client services teams. This Agency puts their success squarely down to the quality of people they hire. They look for people who share their passion for creativity and who are prepared to push boundaries for their clients.

The Digital Agency:

- A wide variety of clients in both B2B & B2C environments
- Continuous investment in employee engagement and staff welfare
- Relaxed and creative culture where personal development is actively encouraged

The Project Manager Role:

In this role you will be responsible for the day to day account management of clients, ensuring that they are happy and that the projects run smoothly. Your main duties will include:

- Managing digital project workflow and ensuring jobs are scheduled in

accordance with deadlines

- Liaising with Creative and Client Services teams to ensure all stakeholders are kept up to date with progress
- Scheduling studio workload
- Developing and maintaining strong client relationships and effective account management
- Leading planning meetings internally with Developers, Designers and Strategists to devise effective responses to projects

About You:

You will be experienced in Digital Marketing whilst being super organised and have a high attention to detail. You will have a keen creative eye and be happy to get stuck in to a fun, friendly but fast-paced environment. Key requirements are:

- 2+years experience in Digital Marketing, ideally within an agency environment
- A solid understanding of web projects and implementation methodologies
- Strong stakeholder and account management skills with a proven track record of working as part of a team
- Excellent organisational skills
- Confident communication skills and the ability to build rapport

How to apply

This is a sought after Project Management position and this Digital Marketing Agency have built up a solid reputation as an employer - so we envisage that the role won't be open for long! If you'd like to be

considered, please click 'apply' below

You will receive an email shortly after your application - you will need to read and respond to this to complete your application.

You must be eligible to work in the UK.

([http://www.fish4.co.uk/advice/trainin/courses/?tc\\_courseid={](http://www.fish4.co.uk/advice/trainin/courses/?tc_courseid={)

**Agile**

- Management, development and mentoring of project based personnel, ensuring all certification, PPE and personnel issues are addressed
- Production, monitoring and updating project programmes
- Build and develop long term business relationships with current and prospective clients, assisting in the winning of new projects
- Maintain a safe and tidy site, and the effective engagement and supervision of Subcontractors.
- Accurate and timely completion of required paperwork and documentation

#### **What we're looking for;**

- Strong, proven Project Management experience within reinforced concrete frames and associated groundworks and infrastructure projects
- Excellent knowledge and awareness of Health and Safety, with a practical hands on approach
- Strong negotiation skills with the ability to liaise at various levels, building strong, sustainable relationships at all level
- SMSTS, CSCS (management)
- A degree or equivalent in Construction Management would be an advantage
- Temporary works coordination/ appointed person/ lifting operations would be desirable
- Good IT skills with the ability to use MS Project. Asta would be an advantage
- Flexible in project location with ability to commute into London
- Valid driving license and access to a serviceable, insured vehicle

This is a permanent opportunity to join a well-established, expanding company who can offer genuine career stability, progression and support to further your career, and a competitive salary and package.

If you feel that you may be suitable for this Project Manager role, then please apply now!

**Project  
Manager**

are funded and co-designed by schools and businesses. The events improve the potential employability of children and young people in schools, Further and Higher Education by linking them with businesses.

Our renowned “Make The Grade” programme is the bedrock of our work and you will be responsible for leading a small team to deliver this, and other services, to clients across Birmingham and the Midlands.

You will join us at an exciting time – with growth consolidated in London and Birmingham we will shortly be scaling our activities with a view to growing our offer and services in existing locations and new areas of the country.

This position is initially being funded by the National Lottery through the Big Lottery Fund, but will continue beyond the current funding period.

### **Responsibilities**

#### **Key responsibilities will include:**

- Managing and developing a small team.
- Delivery of projects ensuring that they are delivered on time, to budget and to client specification.
- Effective account management of relationships with partners, including businesses, schools and learning providers.
- Organising, training, presenting to and managing large groups of volunteers.
- Developing our pool of employers involved in activities.

- Ensuring that administrative duties including maintaining a contracts schedule and ensuring all activity recorded on our bespoke CRM system is carried out.
- Preparing resources and supporting businesses to prepare resources and activities for workshops.
- Producing regular internal and external reports for clients and funders and to the rest of the team to support their activities.
- Working with the Business Development & Partnerships Manager to ensure client satisfaction.
- Acting as a role model and working confidently with young people.

### **The Person**

You will have a strong background in project delivery / management and ideally have had some exposure to the Public and Private sector and their processes. A good working knowledge of Educational schemes is desirable. Experience in managing a small team is essential, with a proven track record in coaching and developing staff. You will have excellent communication skills, both written and verbal, with good customer awareness skills along with the ability to work well as part of a busy team. Self-motivated, target-driven and accountable, you will have good organisational skills, with a methodical approach to task delivery and attention to detail and have a sound knowledge of Microsoft Office packages. You will have a flexible, ambitious and positive attitude to deal with working in a fast-paced office with diverse requirements. With the ability to multi-task and work

effectively under pressure, you will also demonstrate commercial awareness and the ability to deliver projects from concept to completion stage.

### Eligibility

Applications will only be accepted from candidates who are authorised to work for any UK employer.

Candidates should be able to drive, have a clean driving licence and access to a car in order to travel to outlying schools.

The organisation is an equal opportunities employer.

### To Apply:

Apply with a copy of your CV and a covering letter (max. 2 sides of A4) outlining why you want to work for this organisation and what attracts you to the role. Applications will not be considered without a covering letter.

**Deadline: Sunday 30th October 2016**

Project Manager

Full time

Fixed term until 01.03.18

£36,000 per annum

Our clients Apprenticeship Hub project has an exciting opportunity for a Project Manager. The project will provide advice, guidance and support to employers raising awareness and increasing the number of apprenticeships within the York, North Yorkshire and East Riding Local Enterprise Partnership (The LEP) region through the Apprenticeship Hub project which is funded through the European Social Fund (ESF).

The Project Manager will have responsibility for the management, co-ordination and full implementation of the Apprenticeship Hub project across The LEP region.

Please see the job description for further details, this will be sent to you via email when you apply.

This role is dependent upon successful outcomes of ESF project applications to the Skills Funding Agency. The post is fixed term for 18 months with a salary of £36,000, subject to qualifications and experience.

Full service digital agency seeks brave and fearless project manager to help them grow their clients businesses by delivering beautiful and innovative websites and digital products.

They work closely with a select range of premium independent organisations and use strategy, creativity and technology to help them build better businesses. They require a well rounded project manager, e-commerce focussed, who is equally confident talking directly with business owners and managers as they are with tech, design or security teams.

They develop long term relations with great clients based on pragmatic and measurable advice that drives growth and innovation. They need you to help them nurture these relations with great interpersonal skills, creative flair, a straight talking and proactive approach, and a sharp commercial focus for their business. In return they allow you freedom to drive innovation and change where it achieves these goals, they also give you a great environment, team, external partners and support from their office management team and the Head of Delivery. You will be required to manage multiple projects and teams as well as the project P&L and ensure the team use their project management processes and tools.

They are a full service agency that

Recruiter	Peabody
Location	London (Greater)
Salary	£40000.00 to £50000.00 per year
Posted	25 Oct 2016
Closes	07 Nov 2016
Sectors	Construction & Skilled Trades, Surveying & Property
Contract Type	Permanent
Hours	Full Time

Peabody has an exciting opportunity for a Project Manager to join our team in London. The successful applicant will join us on a full time, permanent basis and will receive a competitive salary of £40,000 - £50,000 per annum.

When you join Peabody, you join an extensive and growing business. One with 29,000 homes, 80,000 residents and a 150-year history. As a major housing association we have outstanding challenges for people with talent and motivation. But we also have a strong commitment to the ideals of our philanthropist founder: George Peabody. That means you'll have every chance to achieve – while making a difference.

Our principles are simple: we believe in helping people and communities to grow, in estates that are springboards – not safety nets. With operations in nearly every London borough and one of the sector's largest community regeneration programmes, we're always keen to meet talented people who support our ambitions.

This is a fantastic opportunity for a hands-on project manager with extensive experience in project and change management, both strategic and operational.

Reporting to the Business Change Delivery Manager, the **Project Manager** is responsible for effectively managing and leading the delivery of projects within core change

programmes to achieve programme objectives. Additionally the role holder will be expected to support continuous improvement activities across the organisation, working in close collaboration with the business and providing consultative support where required.

### **Knowledge/experience/skills required by the Project Manager**

#### **Essential**

- Experience in project and change management, both strategic and operational.
- Ability to move from understanding of the strategic goals to a planned programme of work.
- A good understanding of practical tools and techniques in the areas of programme management, project management, change management, facilitation.
- Experience of complex multi-party project definition, design and implementation.
- Able to demonstrate commercial awareness, a robust understanding of the financial implications of change and business case preparation.
- A well-developed conceptual aptitude and the ability to critically analyse opportunities and create innovative solutions to suit future business needs.
- Proven experience of effectively managing stakeholder relationships, with the ability to influence and persuade through personal credibility, integrity and professionalism.

- Ability to work to a consistently high standard in multiple initiatives simultaneously and to meet deadlines.
- Demonstrates an approach to work that is characterised by commitment, motivation and energy.
- Excellent presentational and written communication skills and the ability to interact professionally with a diverse group, executives, managers, and subject matter experts.
- Demonstrated willingness to be 'hands on' – to do as well as to manage.

### **Desirable**

- Experience in writing functional specifications.
- An understanding of a range of change methodologies and theoretical frameworks.
- Experience of designing engagement programmes and of managing the communications elements within them.
- Experience of changing attitudes and behaviours, aligning people and processes behind change strategies.
- A good understanding of practical tool and techniques in the areas of Business Process Analysis.
- A working understanding of Lean Six Sigma approaches.

### **Qualifications required by the Project Manager**

- A-level or equivalent formal education.

### **Desirable**

- Degree or equivalent; certification in areas such as project management, change management, business analysis and housing management.

**Closing date & time:** 07/11/2016 - 5pm

**If you feel you have the skills and experience needed to become our Project Manager please click 'Apply' now to be directed to our careers page and complete your application. Please monitor your emails also during this time.**

Peabody is an equal opportunities employer and positively encourages applications from suitably qualified and eligible candidates regardless of sex, race, disability, age, sexual orientation, gender reassignment, religion or belief, marital status, or pregnancy and maternity.

Recruiter	Stonbury
Location	Bedfordshire
Salary	£35K + Car + Bonus
Posted	26 Oct 2016
Closes	23 Nov 2016
Ref	ProjectManager/SB
Contact	.
Sector	Engineering
Contract Type	Permanent
Hours	Full Time

## Project Manager

**£35,000 + Car + Bonus**

**Location: Bedfordshire**

Stonbury is a market leader in the niche area of civil engineering within the water industry. Our company's success can be attributed to our extensive knowledge and experience gained from working closely with our clients to deliver a range of cost-effective engineering solutions including the repair, refurbishment and maintenance of water company reservoirs, and associated assets along with the new construction of new assets to values up to £2m.

We are looking to recruit a Project Manager to serve the Thames Water and Affinity Water areas of operation however the ideal candidate will need to be flexible and occasionally manage work in the Anglian Water region.

The successful candidate will be an aspiring site/construction manager with a minimum of 5 years' experience in the field two of which must have been spent in a managerial role. You will be accustomed to delivering client projects in a highly collaborative and proactive manner to the agreed programme by working alongside the Commercial Manager ensuring that work is completed within clearly defined budgets and timescales.

**Specific duties will include:**

- Develop a realistic yet challenging cost budget with the Commercial Manager
- Produce an accurate project programme using MS Project software
- Conduct risk assessments and production of RAMS
- Manage health, safety, welfare and environmental issues throughout the project lifecycle
- Ensure works are delivered to very exacting quality standards
- Perform Principal Contractor duties as defined in CDM 2015
- Attend sites at pricing stage to agree scope of works and quantify with clients
- Maintain excellent communication with the client and all team members throughout every project
- Ensure the Company Management System (to ISO9000, ISO14000 & OHSAS18000) is followed by the team at all times
- Requisition key labour, plant and material orders via the procurement team
- Manage site supervisory staff, directly employed labour resources and approved sub-contractors
- Compile all contract completion documentation.

For Stonbury, maintaining our brand is vital. This can only be achieved by having the right individuals with the right personal skills to consistently deliver our services. We perform a large amount of work for very few clients under long-term framework agreements, therefore our relationship with these clients is key. You will be required to work in conjunction with the Stonbury 10 Commandments as follows:

1. At all times over provide on levels of service to our clients.
2. At all times portray the Stonbury Brand and what that stands for.
3. Seek perfection in the Quality of our workmanship.
4. Make Health and Safety a priority not just to an acceptable level but one that is effective and highly visible.
5. Follow the Company Management System.
6. Embrace innovation, no knee jerk 'what was wrong with how we used to do it'.
7. Seek to improve Stonbury's performance, make your voice heard.
8. .Embrace, support and Encourage growth at all times.
9. Make the effort to communicate better.
10. At all times be positive.

In addition to possessing the right personal skills, the successful candidate will have extensive experience in the delivery of civil engineering projects, ideally gained from within the water industry. You will already have a nationally recognised certificate of Health and Safety or NEBOSH qualification, although Stonbury will provide the necessary support to assist you to achieve this if required. Experience in the clean water industry, working at height and in confined spaces together with good computer literacy, including MS Office would be also desirable.

**In return, Stonbury offers a competitive salary of £35,000pa plus:**

- Substantial annual bonus scheme

- Generous company car scheme/car allowance
- Pension scheme (6% contribution by the company)
- Life assurance (2 x salary)
- 21 days holiday + bank holidays

If you feel that you may be suitable for this Project Manager role, then please apply now!

Foundation Certificate in

We are looking for a highly motivated and well organised Software Project Manager to join our team to work with our clients to plan and deliver successful projects. Projects will include Software Development and deployment, including Web, Mobile and Desktop, elements of data migration, business intelligence reporting and business change.

This is an exciting time to join the team as we are looking to significantly develop the business and the products we offer to our clients. This role offers a fantastic opportunity for someone to play a key role in ensuring client delivery in this period of growth.

You will work day-to-day with the Development, Design and QA teams and continuously stay in touch with clients. You will need to be able to take a balanced view of the delivery of solutions across time, cost and quality and be able to communicate effectively to both technical and non-technical audiences.

#### **Key responsibilities:**

- To lead and coordinate the scoping, technical requirements gathering, estimating and planning for single or multiple projects
- To anticipate, manage and resolve issues, risks and dependencies that may impact on the delivery of the projects
- Assemble the project team, assign individual responsibilities, identify appropriate resources needed, and develop schedules to ensure timely completion of projects.
- Leverage technical expertise for project planning, resource

- management, system / technology / validation, testing and implementation planning
- Provide technical and leadership guidance and direction to the team to ensure accurate and timely completion of work
- To act as a first point of contact for all problems and obstacles on a project
- To ensure that project progress is reported in an accurate and timely manner
- To ensure that all projects are delivered with quality as a priority and that appropriate levels of testing and technical governance is carried out
- Proactive and understanding approach to working and negotiating with others, with strong negotiating and influencing skills

**Desired Experience:**

- Experience of successfully delivering complex software / IT projects
- Degree or equivalent qualification/experience in IT/ ICT / Computer Science / Engineering
- PMP / Prince II / Agile or equivalent experience, would all be desirable
- Experience of managing resources, budgets and performance expectations effectively in order to drive business and service performance, accepting personal accountability for results
- Ability to work within a team

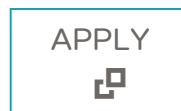

- Ability to motivate people
- Effective leadership skills
- Ability to work with staff and individuals from different organisations and at different levels of seniority
- Excellent oral, written and presentation communication skills
- Evidence of analytical, investigative and problem solving abilities
- Ability to meet deadlines and prioritise a varied and substantial workload

*If you are an experienced Project Manager with a strong interest in software and are looking to join a unique, specialist team, playing a highly responsible role in the development of products and delivery of projects we would love to hear from you.*

#### **Rewards & Benefits:**

- 25 days' holiday, increasing to 29 after 2 years' service (not including Bank holidays)
- Company pension scheme
- Medical cash plan – including employee assist programme, contributions to dental, optical, physio etc.
- Employee discount scheme – an online platform for all staff offering a variety of discounts at various shopping outlets
- Outstanding training and progression
- Childcare vouchers
- Refer a friend scheme
- Regular staff social events
- Early Fridays finishes in the summer
- Long service award
- Cycle to work scheme

### Agile Project Manager - Reading - 6 Months - £350-400 p/day

Agile Project Manager - Reading - 6 Months - £350-400p/day

My client, a global software and solutions provider, are looking to appoint an Agile Project Manager on an initial 6 month contract, to be based out of their Reading office.

The successful candidate will have extensive experience in delivery of complex software development and implementation projects, in a client facing capacity, using both Agile and traditional project management methodologies.

Key responsibilities will include;

- End to end management of project processes and deliverables, from PID and kick off through to implementation and cutover
- Project management of agile software delivery teams, from requirements capture through to development and testing
- Project estimation, resource planning and risk mitigation
- Provide detailed reporting on resource utilization, project timelines and performance
- Own change control process, and act as first point of contact for the client

The successful candidate will almost certainly hold formal project management qualifications (Prince2, PMP, APMG) with agile/scrum qualifications a definite plus. As this is a client facing position, exceptional communication skills both written and verbal are essential.

Whilst this role is to be based in the Reading office of this organisation, national travel to client site will be required from time to time. All interested applicants should bvear this in mind before applying.

This is an exceptional opportunity to secure a potentially long term contract with a growing global technology provider, and as such if you feel you meet the above criteria please do not hesitate to apply

McGregor Boyall is acting as an Employment Business in relation to this vacancy.

## Project Manager - Cheshire at Computer People Manchester, NW M11ED

### About the Job

#### **Project Manager - Cheshire**

#### **Project Manager - 6 Months**

Project Manager you will be driven by results and be committed to managing and delivering projects which support the expansion of our business. You will be a caring and approachable person with the ability to forge good working relationships at all levels both internally and externally. This combined with your ability to plan and your attention to detail will make you an excellent addition to the team. We need someone who can take the lead on multiple projects and help in the co-ordination and planning of other larger projects. Ensuring day to day tasks are carried out in line with the project scope and liaising with software vendors. A key part of the role will be communicating plans and organising tasks with members of the Business and IT teams therefore communication is key to the role.

Work with the business and senior stakeholders to ensure the projects are delivered to agreed scope, within agreed cost and to the agreed quality.

- Manages day-to-day operational aspects of a project and scope.
- Maintains appropriate plans including Project / Communication / Testing/ Training

## Project Manager - Group Level at Cott Beverages

### Leicestershire, MID

#### About the Job

Cott's UK operations include three major bottling facilities in Kegworth (which is also home to Cott's UK business unit headquarters), Bondgate and Nelson. Since 2007, Cott's traditional core business in private label soft drinks to major retailers has expanded with growing sales in sports and energy isotonic categories through wholesale channels into various retail stores and outlets.

Due to the continued growth of the business they are now looking to recruit a Group Project Controller who will report to the Operations Director.

#### KEY PURPOSE OF THE ROLE:

The fundamental objectives of this role are:

Optimise organisational value (ie growth, cost reduction, quality improvement, safety risk reduction, facility and asset obsolescence improvement, financial control, etc) through optimum definition and execution of project agenda.

To compile/coordinate a broad "project ideas" list (capital and non-capital), facilitating an on-going prioritisation process to generate: a StratPlan Project list, an AOP Project list, and a live forecast for projects to be implemented in current year.

To clearly define and coordinate and align business approval for project implementation resource to successfully implement the project agenda.

To directly manage and coordinate Group Project Management resources (employed and contracted) to successfully implement agreed major projects, ensuring successful engagement of operating site teams.

To define and continuously improve the process of project approval, project management, post project review.

#### PERFORMANCE CRITERIA:-

Definition:- Expectations of key standards of performance within the role by which the individual will be measured.

- Identify and agree strategic direction and value of project workload. Generate and maintain a rolling 2/3 year pipeline of projects and initiatives. Create project justifications based on Return on Investment (ROI) analysis (guide: IRR of total capital budget >40%), business benefits as defined by project capex document (or similar), deliver 10% improvements in safety and quality performance pa. <

Back to Job Forecast results [Apply](#) [Star](#) [Email](#)

costs, timing, benefits, asset transfer/write-off and accelerated depreciation).

Maintain the live, current-year project forecast, adjusting the AOP project list dependent on new prioritisation. Communicate this widely, drive alignment, ensure financial forecasts are consistent.

- Liaise with commercial, operational, quality/technical, safety and engineering colleagues to capture, scope, quantify and prioritise project ideas, ensuring alignment to StratPlan and AOP Capital Project lists and the project forecast for current year.
- Define a project management plan to ensure successful execution/management of the live project workload. Will include: scope, costs, benefits, schedules, work plans, resource requirements, timelines, commissioning plans.

May involve employed resource and contracted, group resource and site-based, and of varying skill/experience level appropriate to the project tasks. Engage and align this plan with all stakeholders.

Directly manage the Group Project Management resources.

- Deliver projects on time, to budget, with successful ramp-up, no unplanned business impacts, which deliver the planned business benefit. Ensure good standards of financial control and post project review to dispassionately establish project success (or not).
- Define the Cott method of Project Management and Change Management, ensure compliance, and continuously improve the method and the capability of Cott to define and execute projects successfully.
- Directly manage some projects.

Provide a "can do", proactive business service to scope and estimate "what-if" projects, and project options/alternatives, thereby facilitating better business decision-making and choices.

#### KNOWLEDGE REQUIREMENTS:-

- Knowledge and skills to manage budgets, project funding & costs, financial management and financial control.
- Project Management.
- Specific knowledge of the soft drinks industry, products, equipment, & suppliers (materials & equipment) is an advantage to the identification of opportunities and delivering results through sustainable, practical solutions.
- Specific knowledge of manufacturing and/or logistics environments, methods, systems, and cultures is an advantage to the identification of opportunities, and delivering results through sustainable, practical solutions.
- Computer literate using Microsoft office suite, Microsoft Projects, AutoCAD, and business management systems.

Knows how to evoke creative and innovative thinking from team members while supporting their ideas to fruition

#### COMPETENCE, EXPERIENCE & QUALIFICATIONS :-

- Strong organizational skills, able to prioritise a complex agenda, avoid distractions and deliver results. Ability to develop, manage and deliver large scale projects.
- Communication and alignment: able to drive alignment and enthusiasm across a broad stakeholder population.
- Drive for results, in both the short and medium time horizon. Delivering results personally and magnified results through others (via good prioritisation of initiatives and alignment/coordination)

[Back to job search results](#)

[Save](#) [Email](#)

of resource).

Resilience and perseverance to establish a CI culture.

- Proven leadership skills and business acumen and the ability to work with different functions within the organisation. Integrity to handle sensitive topics and respect/value the contributions of others.
- Proven deliverer of results, with experience of seeking and identifying cost opportunities; improving efficiencies; generating innovative/creative solutions.
- Ability to grow long-term relationships with suppliers and internal stakeholders.
- Engineering competence (electrical, controls, mechanical or buildings/infrastructure) sufficient to understand engineering specifications, design requirements, legislative responsibility, contract requirements and leverage, and management of specialist engineering areas without personal expertise.
- Qualified to graduate level and/or capable of demonstrating experience gained from managing multiple or large scale projects, and/or PRINCE2 project management qualification (or similar).

## Project Manager at Integral Powertrain Milton Keynes, HC MK11

### About the Job

**Integral Powertrain** has a unique opportunity available for a **Project Manager** to join the team in **Milton Keynes**. The role is a **full time, permanent** position offering a **competitive salary**.

Here at Integral Powertrain we are developing technologies which have the potential to change the future of the way vehicles are powered. Working with prestigious manufacturers and Tier 1 suppliers, our engineers create innovative, complex powertrain engineering solutions used for a wide range of applications.

The **Project Manager** will be responsible for managing, monitoring and delivering technically demanding complex cross-functional projects ensuring that key targets are achieved within financial and time constraints to meet the customer requirements. Ensure customer and stakeholder relationships are managed effectively and that communication on project status and requirements are fully understood by all.

#### What are the responsibilities of the Project Manager?

- Ensure that the project is delivered on-time, within scope and within budget
- Coordinate internal resources to deliver the project
- Assist in the definition of project scope and objectives, involving all relevant stakeholders
- Work with functional managers and chief engineers to ensure resource availability and allocation
- Develop a detailed project plan to monitor and track progress
- Manage changes to the project scope, project schedule, and project costs
- Measure project progress using appropriate tools and techniques
- Report and escalate any issues to management as needed
- Successfully manage the relationship with the client and all stakeholders
- Evaluate any project risks and work with stakeholders to minimise and mitigate project risks
- Establish and maintain relationships with customers
- Create and maintain comprehensive project documentation

#### Our ideal Project Manager will have the following skills & experience:

- Degree educated, preferably in the field of engineering
- Proven working experience in project management in the engineering sector

[Back to job listing page](#)[Apply](#)[★ Save](#) [✉ Email](#)

- Ability to communicate at all levels with the client
- Excellent written and verbal communication skills
- Excellent organisational skills including attention to detail
- Experience of working with a project management tool e.g. Microsoft Office, PRINCE II etc.
- Microsoft Office knowledge to include Excel and PowerPoint

Why not click '**apply**' today? Don't miss out on this opportunity to further your career as our **Project Manager**.

This Job Description will be reviewed regularly. You will be required to undertake other tasks that can be reasonably assigned to you, including development activities, which are within your capability and grade.

## Project Manager - Legal Software

### About the Job

**Project Manager - Legal Software****Based in London (EC2)****Salary up to £55,000 + Excellent Benefits**

The world's largest independent provider of legal software is currently looking to recruit an experienced Project Manager in London.

**The Role**

Your focus will be on delivering on-time and on-budget implementations, ensuring that client expectations are met and exceeded. You'll plan, manage and deliver multiple projects at any one time, often for more than one client concurrently.

With software implementations for new clients, you'll prepare project plans, assist the client through the transition to the new software and project manage tasks / deliverables as assigned in the overall implementation. You'll also be onsite during the post live phase and first month-end to ensure a smooth transition. For existing clients you'll project manage and plan specific pieces of work such as upgrades, customisations, integrations and system testing.

**The Candidate**

The ideal candidate for the Project Manager role will be a strong results-focused individual who has the ability to set and manage personal goals & deadlines. You'll possess a methodical, practical approach to problem solving, as well as the ability to assess and manage risk, implementing appropriate plans and actions.

In addition you'll possess outstanding organisation, communication and presentation skills and a quality-driven approach to work, and you'll need a Prince2 Project Management Methodology accreditation, and a thorough knowledge of MS Project.

**The Company**

A market-leading international business providing comprehensive business management software for law and professional services firms across the globe. This is a great opportunity for an experienced and dynamic individual to play an important role in their continued success.

This role will suit candidates who have experience as the following: Project Manager (Software), IT Project Manager, Software Implementation Leader, Prince 2, PMI, PMP, Software Project Manager, IT Software Implementation Manager.

## Technical Project Manager (Agile, Scrum) - up to £55,000

### About the Job

Technical Project Manager (Agile, Scrum) - Hatfield - £55,000

An exciting opportunity has arisen within a highly regarded, market-leading retail business for a Technical Project Manager. The ideal candidate will have come from a development background and have experience of the full software development lifecycle (SDLC).

The successful Candidate must be willing to roll their sleeves up - they will be involved very closely with technology and technology teams.

Project Management, Agile, Business Analysis, SDLC, SQL, RDBMS, Software, Leadership, SQL

Our client, an innovative and forward thinking Technology company who believes and invests in ground-breaking and industry leading technology solutions are looking to recruit an Agile Project Manager to be based out of their Hatfield Head Office

#### Knowledge, Skills and Experience

You will be responsible for the management of multiple software focused Technology projects through the full project lifecycle. You will track budgets, analyse requirements, develop project and test plans, track issues and risks as they arise and work with the relevant teams to identify suitable solutions.

#### Responsibilities:

- \*Manage multiple (usually 2-4) software development projects concurrently through the full project lifecycle.
- \*Analyse requirements and design software solutions in co-operation with Product Owners and Technical Team Leads.
- \*Develop project plans and track progress of development against agreed targets.
- \*Track project budgets.
- \*Manage IT hardware delivery.
- \*Manage the implementation, testing and go-live stages of the project.
- \*Develop test plans for the various stages outlined in our methodology. Undertake, track and manage resolution of issues identified during testing within the timescales of the testing phase.
- \*Adapt and develop the internal methodology for IT projects.
- \*Liaise with the Logistics Development team and other Business teams on project requirements.
- \*Manage the relationship between internal IT departments and external contractors, both on and off-site.
- \*Check and negotiate the IT aspects of any contracts with any external contractors.

\*This role could involve managing projects in our remote warehouses around the UK and the World. Consequently, travel between the head office and these sites will be required.

\*During implementation periods of project, you will be expected to be available to support the business during the evenings and weekends.

Essential Skills:

\*Strong technical background, Computer Science Degree background or equivalent.

\*Delivery focused Project Manager with full project lifecycle experience working on ground-up, in-house software development projects.

\*Able to demonstrate a proven ability to lead software development projects and ensure objectives, goals, and commitments are met.

\*Strong interpersonal skills including mentoring, coaching, collaborating, and team building including the ability to interact with developers and technical leads in a technical manner.

\*Strong analytical, planning, and organizational skills with an ability to manage competing demands.

\*Knowledge and understanding of business needs with the ability to establish/maintain high level of customer trust and confidence.

\*Some commercial experience as a Business Analyst or a Developer would be strongly preferable. The role requires that Project Managers can blend their role with that of a BA when the project necessitates it.

\*Knowledge of SQL and its use in analysing data from relational databases is essential.

\*Excellent oral and written communications skills and experience interacting with both business and IT individuals at all levels including the executive level.

\*Creative approach to problem-solving with the ability to focus on details while maintaining the "big picture" view.

You must have managed ground-up in house development projects, as opposed to a Project Manager who rolls out software and does software upgrades etc.

This position would be an excellent opportunity for project managers wishing to handle a number of projects of varying sizes and gain hands-on experience of working within a large, market-leading environment.

Key skills

Project Management, Agile, Business Analysis, SDLC, SQL, RDBMS, Software, Leadership, SQL

Agile Project Manager - Hatfield - £55,000 + Shares, Healthcare, product discounts and lots more.

We will always email you a full role specification, name our client and wait for your email authorisation before we send your CV to this organisation. Deerfoot IT: Est. 1997. REC member. ISO certified. \*Each time we send a CV to a recruiting client we donate £1 to The Born Free Foundation (charity no. 1070906).

## Project Manager at Vitaflo International Limited

### Liverpool, NW L3 4BQ

### About the Job

#### Vitaflo (International) Limited

We are currently looking to recruit a permanent, full time Project Manager to work within our project management team. The role is based at our Liverpool headquarters which is situated just outside of the city centre. The working hours are 34 hours per week Monday to Friday.

Working with a cross departmental multidisciplinary approach on multiple projects concurrently, working to deadlines, liaising with project team members and coordinating plans.

The role includes end to end ownership of projects assigned including scheduling and progress chasing, whilst working within the project team.

#### Key Responsibilities

- Launching of new, re-branded and reformulated products from trial production to commercial launch, delisting existing products that are no longer viable and transferring manufacturing to new co-manufacturers.
- Create project briefs for each project
- Complete project briefs and all relevant documentation prior to commencing and project
- Coordinate regular project meetings and update actions following each meeting which are then distributed to all members of project team
- Fully involved within the project life cycle from start to finish
- Keep all project documentation fully up to date
- Carry out any other tasks as requested by Senior Project Manager

Must be able to travel nationally and internationally when required

#### Qualifications

- Educated to Degree level or equivalent
- Project management qualification

#### Skills and Characteristics

- Proven track record within a Project Manager role, demonstrating the ability and skills to lead
