### Senior PMO Manager

**Location:** Central London**Salary:** Up to £89,000 p.a. plus excellent benefits**Work type:** Permanent

Currently seeking a PMO Manager for a large Investment Banking organisation based in central London. The PMO Manager will indirectly lead the governance, reporting, planning and support services for a major programme of organisational change projects.

A background in Investment or Commercial Banking experience (or advisory into those markets). Candidates with a background in Project Management would be highly desirable although this experience is not essential.

Essential skills:

- Experience in a similar PMO Manager role
- Strong senior stakeholder management up to Director level
- Must be comfortable working in an Agile delivery environment
- Highly organised and output orientated
- Experience of hands-on project management would be advantageous (not essential)

This is an exciting role with a well-known established organisation with plenty of opportunity for career progression. Please get in touch for immediate consideration.

### Senior Project Manager - Civil

Cardiff, Permanent, Bonus &amp; Benefits

Job ref: JA6287AG

Role Location: Can be based in either Cardiff, London or North Yorkshire

Salary: Competitive package dependant on experience

My client is a leading global outsourcer who are looking to appoint a Senior Project Manager to be based in either Cardiff, London or North Yorkshire.

The Senior Project Manager will take full responsibility for the selection and leasing of new commercial properties. The Senior Project Manager will report direct to the VP of Infrastructure and lead on the end to end process of site selection, creation of office space design and architecture, office space "fit out" & build right through to site delivery.

The Senior Project Manager will have excellent interpersonal, influencing and negotiation skills with stakeholders and vendors to ensure the smooth and seamless completion of site fit outs until completion.

If you are a determined to deliver with exemplary performance, forward thinking problem solver and analytical then this would a good fit for you.

#### The duties will include:

- Conduct thorough due diligence, full office space feasibility. Taking into account the Commercial, Architectural as well as all Mechanical & Electrical aspects
- Selection of contractors for fit outs & site build. Negotiate with vendors to achieve the best technical and commercial solution for the company.
- Responsible for end to end project management ensuring all projects are kept within agreed timelines and budgets.
- Deal and co-ordinate with internal as well as external stake holders. Providing clear and concise communication with all stakeholders at all stages of the process.

#### Required Skills:

- Qualification: B.Arch or BE in Civil Eng with course in Project management
- A certification in Project Management would be a distinct advantage (PRINCE2, PMP)

#### Required Experience:

- Extensive experience in a similar role, ideally within a BPO/BPM environment
- Experience on working on AutoCAD & 3 D views, should be creative in preparing office layouts in compliance with statutory as well as internal requirements to make best use of rented space.
- Competency in analysing electrical & mechanical requirements & design
- Site selection and updated real estate market knowledge is a must
- Infra budget experience with references to life cycle costs & cost of ownership.
- Should be capable of doing basic cost benefit analysis
- Should have skills in creating presentation for reviews and reporting
- Experience of vendor selection & the negotiation of processes
- Experience in creating project plans understanding the dependencies of various activities.

## Senior Digital Project Manager Award Winning Digital Agency

### About the Job

With one of the finest digital agencies in Bristol and the South West, we have a vacancy for an experienced Senior Digital Project Manager who'll enjoy working with senior level clients and supporting the wider success and growth of their lovely project management team.

### What you'll be doing

This is digital agency has a cracking reputation for delivering digital brilliance across all channels, from campaign led social and content campaigns through to large scale CMS driven design and build and eCommerce projects.

You'll be crucial to the successful delivery of large scale projects and business critical clients, working closely with the agencies client services, planning, creative and development teams in the delivery of award worthy work and the ongoing success of clients across the business.

Working closely with the department head you'll also support and mentoring a small team of Digital Project Managers, helping to shape and grow the department as the agency continues to go from strength to strength.

### What experience you'll need

As a Senior Digital Project Manager you'll need to have worked on sizeable web development projects: scoping, creating project documentation, functional specifications, resource planning, working through to delivery, ensuring that projects are on brief and budget. You'll also enjoy being client facing and working closely with internal departments to deliver the goods.

### What you'll get in return for your talents

This is a permanent role with plenty of scope to progress and take on additional responsibilities within the agency. In return for your talents you could earn up to £45k (possibly more for the right person), plus a pension. It's a really

**Industries:** Internet Services  
Computer Software  
Computer/IT Services

**Education Level:** Unspecified

### Job Description

Senior Digital Project Manager  
London  
£45,000 - £60,000 (dep on exp)

Skills & Experience;

- 5+ years' UK experience in digital Project Management

- Digital Agency experience is essential

- Proven experience delivery highly complex digital build projects

- Deep industry knowledge in digital development, strategy, business analysis and/or user experience

- Agile (Scrum, DSDM) and waterfall methodology

- Any experience client side as a digital Project Manager would be useful, but is certainly not essential

A highly respected and progressive London Digital Agency are on the lookout for an excellent Senior Digital Project Manager to help deliver impactful web build, app and products for their clients across Retail, Manufacturing, Entertainment, Travel and more.

This is the ideal role for a highly organised individual who has the diplomacy to build and maintain relationships and manage external and internal stakeholders whilst keeping key projects on track. As the Senior Digital Project Manager you will be well proven in and responsible for managing large scale complex digital projects; producing all documentation on your account; monitoring financial tracking; Identification of risks and issues with projects and participation in new business pitches being able to oversee digital projects through to successful delivery.

For an opportunity to make a real difference in a busy, technically minded and creative digital agency then get in touch!

If you would like to see the job spec for senior digital project management opportunity, please click apply or contact me asap on 01732 458 000 or email me: [stuart.clark@preferred-choice.co.uk](mailto:stuart.clark@preferred-choice.co.uk)

### Company Overview

To us, recruitment isn't simply filling jobs; it's matching the right person to the right job — amazing people for amazing jobs. We specialise in recruitment across the full spectrum of digital industries — but are also increasingly being asked to fill posts in a wider range of fields.

Our expertise and experience help companies fulfil their potential and employees broaden their horizons. We offer an innovative and fast-moving service in line with the dynamic nature of the modern world of work. This enables us to locate and engage the finest employers and the highest calibre applicants. The right job and the right person are always out there — we bring them together at the right time, in the right place.

Since being set up in 2001, we have gained a reputation for being as honest and open as we are professional and confidential. This is because our consultants always take the time to understand individual needs. In turn, this has led to our clients using us again and again — and has led many companies to abandon their preferred supplier lists in favour of Preferred ChoicePreferred Choice.

The company is specialising in the delivery of user-centred omni-channel e-commerce solutions to both B2B and B2C clients using Hybris as a platform. Working with a range of high-profile clients, Envoy has a strong focus on service, security and quality.

**Job Title:**

Senior e-commerce Project Manager, full-time, permanent role.

**Job description:**

We are looking for a Senior e-commerce Project Manager to join our expanding team. This is a full time position and is a fantastic opportunity for an ambitious and talented individual to join a fast growing agency. We have a policy of only hiring exceptional candidates so you can be sure that you would be working with a highly skilled team.

**Skills, qualifications and experience:**

Agile project management experience

Demonstrable experience running Agile projects using Jira and Confluence, utilizing the Scrum boards and workflows

e-commerce platform implementation experience with large budget and development team

Excellent communication skills, be highly comfortable presenting project updates to the key stakeholders including board level

Passion and drive with a commitment to deliver high quality projects

Key responsibilities

Manage the full project life cycle of assigned projects, working closely with the Directors, Programme Manager and the technical delivery teams

Ensure projects are delivered according to the approved specifications within agreed scheduled and approved budgets

Provide assistance to the Business Analysis and Client Services teams in creating Statements of Works

Create and maintain project plans and time lines for designated projects

Drive the technical requirements estimation process with assistance from BA and the development team

Briefing the development teams on the requirements and the desired solution to ensure a full understanding of the client requirements is communicated comprehensively

Collaborate on creating detailed test plans with the BA, developers and input from key stakeholders

Conduct daily stand-ups with the development teams to ensure seamless project delivery

Act as a central contact for your project teams to ensure successful delivery of digital solutions

Run sprint estimation sessions with the development teams

Plan and run the development sprints using Jira and Confluence

Run sprint close down workshops and show and tell sessions with the client

Secure all client approvals for each stage of the project before proceeding to the subsequent stage

Enforce strict Envoy change control and ensure scope is tightly managed with all out of scope requirements documented and accepted by the client before going through change control

Create and maintain a project RAID for all projects. Escalate any risk/issues to relevant stakeholders in a timely manner

Update and circulate weekly status reports and attend weekly status meetings to report on the progress of your projects both internally and externally with the client

Oversee and take ultimate responsibility for all financial aspects of your projects

Manage the financial risk of projects by ensuring that all project members adhere to best practices and record time spent on tasks accurately

Take responsibility for client relationships on delivery of projects to ensure retention and growth of accounts

Support new sales and pitch work

For those clients without an account manager you will be responsible for appropriate revenue recognition, ensures timely and accurate invoicing, and monitors receivables for project including following up on unpaid invoices

Make sure the Envoy Digital Project Governance framework is adhered to at all times and use it tactfully to always facilitate successful project delivery

Hybris platform implementation and product knowledge

Closing date for the applications: 20 August 2016

## Senior IT Project Manager / Project Manager

### About the Job

#### Senior IT Project Manager / IT PProject Manager / Project Management - London

My client, a market leading organisation based in Central London, is looking for a Senior Project Manager to join their highly successful team. The successful Senior Project Manager will be responsible for the management a significant transformation project as well as smaller concurrent pieces of work.

Assessment of Change Requests from internal and external sources will be a key part of the role, including providing creating innovative and cost efficient solutions, plus team management and development and supporting governance process. The ideal Project Manager will have experience of delivering a variety of IT projects as well as knowledge of Process Re-engineering.

This is a fantastic opportunity to join a prestigious organisation at a time when you can become an integral part of the project team moving forward.

#### Essential skills:

- Highly motivated Project Manager with proven experience of managing IT and Business Change deliveries
- Ability to 'think out of the box' and drive his / her own agenda
- Great communication skills
- Excellent stakeholder management skills

#### Desirable skills:

- PRINCE2
- MSP
- Agile

This is a great time for a Senior Project Manager to join the team, as there are several extremely interesting projects in the pipeline and the successful Project Manager will have the opportunity to grow within a market leader.

To apply for the role please follow the instructions on the advert.

ninesharp IT is a minimum fuss specialist IT recruitment consultancy. We provide high quality interim and permanent

IT professionals.

## Senior Project Manager - MDM / PIM (Bedfordshire)

IT / IS Senior Project Manager - Master Data / Data Integration / PIM / Stibo

A great opportunity to work with a global organisation who have major exciting and high profile projects to deliver.

We need a Senior Project Manager to deliver a Master Data / Product Information Management project within a brand leading global organisation. The successful individual will be the overall lead for the delivery of the project. You'll need to have strong IS / IT Project Management skills and experience of delivering a Master Data project is a must.

You'll need strong hands-on Project Management skills as you'll be driving the project forward in terms of engaging with 3<sup>rd</sup> parties, managing vendors, reporting back to senior stakeholders and over-seeing the solution to make sure the data model integrates with other solutions.

Evidence of Project delivery in the Master Data / Data integration / Data migration area is essential, as is the opportunity to work in a fast paced environment

Project Manager - Master Data / Data Integration / PIM / Stibo

### About Us

We formed Tria in 2015, having worked in the recruitment industry for more years than we care to remember. We've seen huge changes in the market over the years, most of them positive, and believe that there is still a demand for a staffing organisation that embraces modern recruitment practices, and focuses solely on working with their clients to fill those specialist and hard to fill staffing requirements.

At Tria we welcome the fact that most large organisations are building their own in house recruitment capability and are using effective employer brand strategies to attract great talent. This means our clients only work with us when there is a genuine need for specialist staffing. We don't want to try and be all things to all men, we know what we're good at, and we stick to it.

### Position Information

**Company:** Tria Recruitment

**Location:** Bedfordshire, HC

**Salary/Wages:** 450.00 - 478.00 £ / per day

# Senior Project Manager - Professional Services

Bristol BS12NB

Computer Software

Reporting to the COO, the Senior Project Manager is responsible for scoping, managing and delivering Professional Services projects to SDL's Campaign Management & Analytics customers and to ensure customers get full value out of their Professional Services engagement with SDL.

The Professional Services team manage and deliver post sales activities across SDL Campaign Management & Analytics. Activities include consulting, implementation services, infrastructure / database practices, training and project management. The Professional Services team works with end-clients and partners to deliver implementation services, technical advice and best practice on the deployment of the Campaign Management and Analytics software. Projects may range from tens of days to hundreds of days, on time & materials or fixed price commercials.

## Responsibilities:

- Delivery of highly visible Campaign Manager & Analytics projects
- Allocation and Management of the Professional Services consultancy resources,
- Maintenance of the central professional services resource matrix;
- Delivered using the established SDL Project Management practices
- Maintain project documentation including project plans, forecast and resource matrix
- Project Management of client engagements and Campaign Solution delivery including:
  - Customer requirements capture and alignment with CMA software capabilities (with support from Solution Architect) for best possible solutions for both the

customer and CMA

- Communication with the customers and internally to CMA stakeholders on the progress of each project.
- Identification and management of risks, issues & changes;
- Project Management support of Sales and Client Services opportunities
  - Management of all Campaign Solution scoping and estimation including:
  - Allocation of activity; Consultancy resource allocation and management of Change Controls and Work
  - Orders for future and existing clients.
- Attendance of weekly Professional Service Team Meetings to provide input on current and upcoming work.
- Work with the Client Services team to assisting with the management and growth of customer accounts

**Key Goals:**

- Accurate scoping of projects using Professional Services consultant expertise
- Delivery of projects on time and to budget achieving gross margin targets
- Accurate and professional projects communicate to customers
- Efficient allocation of Professional Services Consultant resources
- This role will have considerable latitude in reaching the above goals

**Requirements:**

- Experienced Project Manager preferably within a consulting background
- Excellent interpersonal skills and a strong communicator through all media types
- Track record of organizing the development and implementation of global projects
- Knowledge and experience of all key project components including; Stakeholder Management, Data Migration, Testing and Risk Management
- Ability to manage client expectations and steer client towards opportunities that deliver best outcomes for both customer and CMA

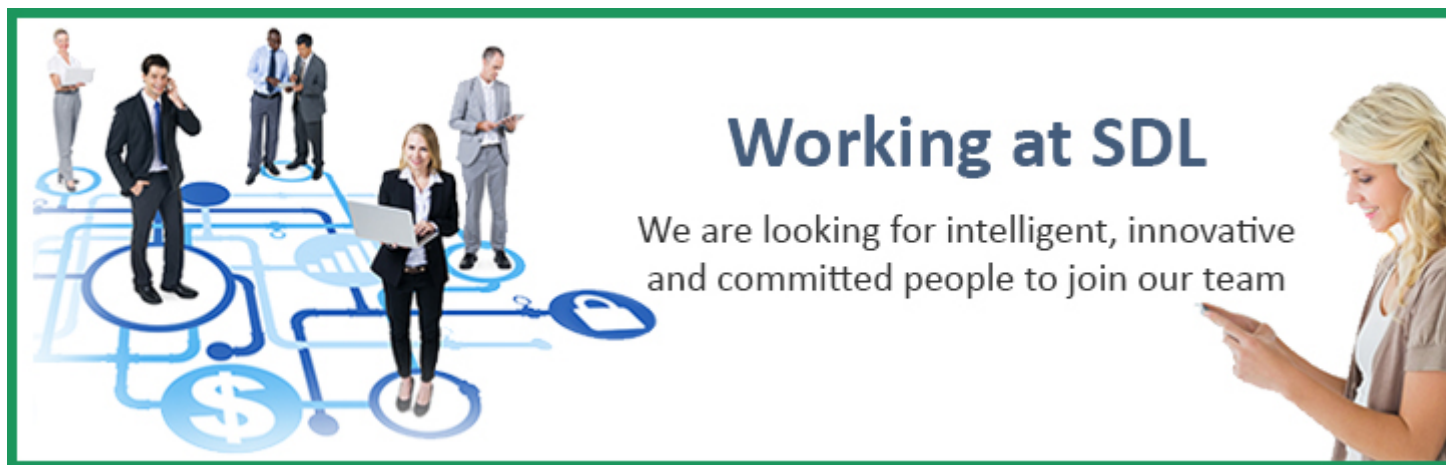

**Desired Skills and Experience:**

- Microsoft Project Management tools
- Strong understanding of SaaS and SaaS delivery ethos
- Hosted and cloud-based service experience a strong advantage
- Systematic problem solving approach, coupled with a strong sense of ownership and drive
- Demonstrable previous experience in successful SaaS delivery organization
- Ability to work independently and in a strong team environment

- Ability to quickly grasp and distinctly explain technological and business concepts
- Passion for technology and innovation
- Strong service focus
- Self-motivated with a can do attitude
- Pragmatism
- Ability to advocate creative solutions and ideas
- Team player with excellent verbal and written communication skills

**Qualification & Pre-Requisites:**

- Have the right to live and work in UK

A recruitment banner for SDL. On the left, a group of business professionals in suits are standing on a blue network diagram that includes a dollar sign and a padlock icon. In the center, a woman in a business suit holds a laptop. On the right, a woman with blonde hair is shown from the chest up, looking down at a smartphone. The background is white with a green border.

## Senior Project Manager

### About the Job

I am currently on the lookout for a Senior Project Manager to join one of my Pharmaceutical clients in the North West on a 12 month contract. My client has sites across Europe, therefore it is essential that you are willing to travel across Europe in line with Project demands.

My client are looking for someone to manage a portfolio of Engineering & Construction CAPEX projects associated with a new €180M new Biotech Facility. My client require the SPM to come from a Mechanical or Chemical Engineering background. If you have been working on I.T. Projects, then this role is not suited to you.

It is not essential that you speak the local language, however any language skills would be a bonus as my client has sites across Europe. Dutch, French or German speaking candidates would be of interest.

**Essential Requirements:**

- Project Managed Pharmaceutical projects in excess of €50M
- Mechanical or Chemical Engineering background
- Minimum 5 years of recent Pharmaceutical experience
- Able to handle Engineering and Construction Projects
- Willingness to travel across Europe

**Desirable:**

- Experience in basic categories of Commissioning, Qualification and Validation.
- Experience in areas such as: steriles, aseptic filling, lyophilisation, biotech manufacturing, solid dose or semi solid manufacturing, packaging or similar is a plus
- Clean Utilities expert

Please share this with colleagues and friends who may be interested in this role.

Computer Software  
Computer/IT Services

**Work Experience:** 5+ years

**Education Level:** Professional

**Career Level:** Manager (Manager/Supervisor of Staff)

### Job Description

We are looking for an experienced Senior Project Manager to project manage multiple work streams as part of a large IT-Led transformation programme. You will be required to provide planning, progress-chasing, monitoring, oversight, reporting across each of the streams, in addition to ensuring that appropriate governance is maintained and benefits are tracked.

Main duties and responsibilities:

- Take responsibility for the definition; documentation and safe execution of a single major project or a number of smaller initiatives
- Identifies; assesses and manages risks to the success of the project
- Effectively estimate costs; timescales and resource requirements for the successful delivery of the project(s) to agreed terms of reference.
- Ensures that realistic project and quality plans are prepared and maintained and tracks all activities against the plan; providing regular and accurate reports to stakeholders; as appropriate
- Provide effective leadership to the project team ensuring that team members are motivated and developing their skills and experience
- Ensure that own projects are formally closed and; where appropriate; subsequently reviewed; and that lessons learned are captured and actioned

Essential knowledge and skills:

Knowledge

- Significant project management experience gained in a change/transformation situation
- Experience of project-managing in an environment of IT-led change
- PRINCE2 experience or similar
- Ideally the person will have provided project management in a government-level public-sector situation
- Experience of working in an Agile environment

Skills

- Highly collaborative
- Strong leadership
- Self-starting
- Good communication including presentation
- Mentoring and Coaching of less-experienced staff to pass on knowledge

Any government/public sector industry experience is a MUST have.

This is a fantastic opportunity to work on a long term programme of work with an immediate start.

For more information, please call Katherine Paraskevas at Preferred Choice on 01732 458000 or email [katherine@preferred-choice.co.uk](mailto:katherine@preferred-choice.co.uk)

### Company Overview

[Back to Job Search Results](#)**APPLY**

To us, recruitment isn't simply filling jobs; it's matching the right person to the right job — amazing people for amazing jobs. We specialise in recruitment across the full spectrum of digital industries — but are also increasingly being asked to fill posts in a wider range of fields.

Our expertise and experience help companies fulfil their potential and employees broaden their horizons. We offer an innovative and fast-moving service in line with the dynamic nature of the modern world of work. This enables us to locate and engage the finest employers and the highest calibre applicants. The right job and the right person are always out there — we bring them together at the right time, in the right place.

Since being set up in 2001, we have gained a reputation for being as honest and open as we are professional and confidential. This is because our consultants always take the time to understand individual needs. In turn, this has led to our clients using us again and again — and has led many companies to abandon their preferred supplier lists in favour of Preferred ChoicePreferred Choice.

## Senior Software Project Manager. £55-65K

### About the Job

Senior Software Project Manager with strong Business Analysis, and excellent business awareness and customer needs management. Based in Leeds.

Salary and benefits: £55-65,000 plus 15-20% performance bonus, pension 10% and healthcare.

As the Senior Software Project Manager, you must have strong business analysis experience, and it would be highly advantageous for you to have experience of working within a software house / consultancy.

Senior Software Project Manager - Key Skills:

- Strong Senior Software Project Management experience.
- Strong business analysis experience.
- Strong customer needs analysis experience.
- Experience deploying Enterprise scale software and data-driven systems e.g. ERP type systems etc.
- Software product deployment and management.
- Agile software development and delivery experience.
- A Track record of change management and delivering on change.
- Good commercial business acumen.
- Good English verbal and written communication skills.
- Must be eligible to work in the UK.

Senior Software Project Manager - Nice to Have:

- A Software Engineering background would be highly advantageous.

About the Role:

Your main responsibilities as a Senior Software Project Manager will be:

- Business Analysis and customer needs analysis.
- Initiating and leading medium to large scale change project initiatives.
- Operating the project delivery processes, ensuring quality, technical and commercial targets and customer

expectations are met or exceeded.

- Owning and continuously improving operating practices and methods and relationship between Customer and our client.
- Managing, leading and motivating a team of consultants.

#### About the Company:

Our client is an established and growing niche consultancy. They pride themselves on their innovation and high level of customer service.
